## Sample Intervention Plans for Parents who have physical disabilities

## What would it take to keep this family together?

**Keys to effectiveness:** Identifying specific tasks that the parent cannot do independently and then looking for a solution in one of 3 areas: 1) environmental modification; 2) assistive technology; or 3) natural support or paid assistant. Adding an Occupational Therapist assessment can be helpful. Sit at their level when speaking to someone in a wheelchair. Ask permission before handling assistive devices.

Disability Etiquette – practical tips to help you accommodate different types of physical disabilities

https://www.unitedspinal.org/pdf/DisabilityEtiquette.pdf

| Common<br>Challenge                  | Intervention Strategy or Resource   |
|--------------------------------------|---|
|                                      | Parent/Child Interaction  |
| Dividing supervision between parents | If only one parent has a disability, identify tasks or time blocks that will be supervised by each parent. This ensures that the parent with the physical disability can gain confidence is parenting tasks and not be overlooked by spouse or providers.   |
| Needs help with basic infant care    | Contact Oklahoma ABLE Tech to explore ways their Adaptive Babycare equipment program can help the parent be more independent. Toll Free: (888) 885-5588   |
| Difficulty attending meetings        | Make sure that accessible transportation is available and that the parent is able to easily navigate to the meeting room using their wheelchair or other assistive devices.   |
|                                      | Google maps now shows wheelchair accessibility under "amenities" <a href="http://www.theverge.com/2016/12/15/13968054/google-maps-twenty-percent-wheelchair-accessible">http://www.theverge.com/2016/12/15/13968054/google-maps-twenty-percent-wheelchair-accessible</a>                                |
|                                      | WheelMate gives you an instant overview of your nearest wheelchair-friendly toilets and parking spaces on an interactive map. It is powered by wheelchair users who add and verify every single location themselves, ensuring it works the way it should. It is easy and simple to use, and it is free! |
